STRETCH FABRIC STRAIGHT WALL

3M, SINGLE-SIDED

Size

This template is 20% scale of full size, and must not be re-sized or scaled.

Layers

Design. Must be used to create and supply your design.

Guide (Non-Printing). Must not contain any of your design elements. May be deleted, if desired.

Areas & Marks

Bleed line
Artwork must extend to this line. Any space between this line and the safe area line must only be used as a quiet area.

Finished line
Approximate perimeter of the visible area, after cutting and finishing.

Safe area line
Important content (text, logos etc.) must be kept within these lines.

Artwork Requirements

Artwork must be supplied:

- At the exact size of this template
- With all fonts outlined
- With all images embedded
- With all design elements on the Design layer
- With background/quiet content all the way to the bleed line(s)
- With all important content inside the safe area(s)
- With none of the template guide lines included or flattened
- With all template elements and text removed
- With no crop marks, bleed marks, colour bars or other registration marks present
- As either PDF (preferred), AI or EPS format
- With exported files checked (e.g. in Adobe Acrobat/Reader) that all design elements are included
- With artwork for both sides included (double-sided graphics only)

For a full list of artwork requirements, please refer to our website.

Considerations

Our thread colours are black or white. Our sewists will choose the most appropriate colour to complement your graphic.

Currently, the dye-sublimation process does not allow for the use of Pantone colours. Any Pantone colours must either be converted to (or replaced with) CMYK colours before supplying your print-ready file.

While we make every effort to finish these graphics as accurately and consistently as possible, due to the nature of printing, cutting and finishing fabrics, some material movement and minor imperfections in alignment can be introduced. For this reason, we highly recommend not attempting to use borders or other elements that would be sensitive to any kind of alignment issues. This includes wrapping continuous or detailed shapes between front and rear graphics (for double-sided graphics).

Please refer to the instructions on the first page.

All artwork elements must be supplied on the Design layer. The Guide layer must be deleted before saving your print-ready file.

This text and all other template elements and guide lines must be deleted or not provided in your print-ready file.
